“ *Life...Death.... they are the eternal twins. It is of course what is in between. Peretz (Perry Paul) Rosenstein, named by his parents after the writer Polish writer I.L. Peretz invisibly embraced millions and allowed them to celebrate the power of secular humanism through the universal language of art.*

Tens of thousands will invariably share in an outpouring of stories of how this man, who was taken by Covid-19, left the world a far kinder place by making a community linked together by THE PUFFIN FOUNDATION. He himself walked softly and his footprint will not be found on buildings or monuments, but will be remembered in the hearts of many.
